

PARTNERS ARE PATIENTS TOO

Your sex and/or needle sharing partners can get help if they have been exposed to a sexually transmitted infection (STI), including HIV. Scan each QR code for more information.

PARTNER SERVICES FOR HIV AND STIs

A free program that confidentially notifies sex and/or needle sharing partners exposed to HIV and/or other STIs, such as gonorrhea and syphilis.

PRE-EXPOSURE PROPHYLAXIS (PrEP) FOR HIV

PrEP is a medication for sex and/or needle sharing partners. It can be taken as a daily pill or an injection given every two months. Both can reduce the chance of getting HIV from sex and/or injection drug use. When taken as directed, PrEP is highly effective for preventing the transmission of HIV.

UNDETECTABLE = UNTRANSMITTABLE (U=U)

A person with HIV who is on treatment, has achieved an undetectable viral load and maintains it for six months and thereafter, cannot transmit HIV through sex to their partners.

LINK-UP MICHIGAN

Link-Up Michigan connects persons living with HIV who are not currently receiving HIV/AIDS care to both medical and non-medical services, like housing and employment support. This program provides individuals with short-term, intensive support through referrals to existing community support programs.

EXPEDITED PARTNER THERAPY FOR STIs

Allows sexual partners to get antibiotic medications or written prescriptions, without having to see a doctor, if exposed to gonorrhea, chlamydia and/or trichomoniasis.

With these tools, you and your partner can prevent and stop the spread of HIV and other STIs.

For more information, please visit [Michigan.gov/HIVSTI](https://www.michigan.gov/HIVSTI) or call 313-269-7573.

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group on the basis of race, national origin, color, sex, disability, religion, age, height, weight, familial status, partisan considerations, or genetic information. Sex-based discrimination includes, but is not limited to, discrimination based on sexual orientation, gender identity, gender expression, sex characteristics, and pregnancy.
